EDUCATION

University of California, Irvine

Bachelor of Computer Science

Irvine, CA

Expected June 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Machine Learning Fundamentals, Distributed Systems

SKILLS

Languages: JavaScript, Java, TypeScript, C++, Python, HTML/CSS

Frameworks/Tools: React, Node.js, Express, Docker, Kubernetes, PyTorch, Tailwind CSS, Vite, Git, Postman, Figma

Cloud/Databases: AWS (EC2, S3, Lightsail), MongoDB, PostgreSQL, Firebase, Linux

EXPERIENCE

Software Engineer

April 2025 – Present

AdamsFoods

Los Angeles, CA

- Built B2B wholesale platform using **React**, **Express**, and **PostgreSQL** with product catalog for **20+** items, admin dashboard, and order processing system, enabling acquisition of **10+** new restaurant clients
- Integrated **AWS S3** and deployed on **AWS Lightsail** for file storage and order tracking, reducing order processing time by **35%** and facilitating **\$10,000+** in wholesale orders

Software Engineer

October 2024 – Present

Commit the Change @ UCI - La Peña Cultural Center

Irvine, CA

- Engineered React-based web application using **Express**, and **PostgreSQL** with **agile/SCRUM** methodologies for nonprofit cultural center managing **50+** monthly events, reducing administrative hours by **60%** through automated invoice processing and event planning
- Built **RESTful** endpoints using **Express** and optimized invoice calculation logic, saving **10 hours monthly** of manual management tasks

Coding & Math Instructor

April 2025 – Present

Lyceum Village

Irvine, CA

- Lead Python programming lessons for **15+** elementary students (grades 3–7), emphasizing computational thinking and hands-on projects
- Design curriculum and lesson plans that introduce core programming concepts including loops, conditionals, functions, and basic data structures

Software Development Intern

June 2024 – September 2024

AdamsFoods

Los Angeles, CA

- Engineered full-stack web application (**AWS Lightsail**, **React**, **MongoDB**, **Express**) for supply chain management, tracking **300+** products and identifying **\$15,000** in potential losses
- Automated inventory processes, replacing handwritten logs and saving **5–7 hours** weekly while eliminating transcription errors
- Containerized application using **Docker** and managed deployment pipeline on **AWS Lightsail** for consistent development and production environments

PROJECTS

DineSafe: Restaurant Health Inspection Platform | *2nd Place Winner, UCI Hackathon*

2025

- Collaborated in a team of **4** to create a full-stack MERN (MongoDB, Express, React, Node.js) application visualizing health inspection data for **400+** Orange County restaurants
- Developed a Python script utilizing web scraping and OpenAI's GPT API for automated report summarization
- Implemented RESTful API with Express.js and MongoDB that handled **300+** documents

Homesteadr: Real Estate Management Platform | *Hack@UCI*

2024

- Developed full-stack application using **React** frontend and **FastAPI/Python** backend with Firebase, connecting **100+** news articles to real estate listings using Groq AI for location keyword extraction
- Implemented Google Maps API integration and created data pipeline processing **700+** property records
